Planning of Thesis work in Computing Science, UmU

The planning document should contain:

A weekly time planning where you can see what parts should be accomplished.

The parts may be:
detailed proposal (this shold already exist!)
what in-depth study are you preparing to do and list some of the sources you intend to read/use
while not satisfied
   re/design the system (what should be used in order to reach the objectivs?)
   implement
   evaluate/results (qualitative or quantitative)
   continue writing the report (discuss layout with your supervisors)
   write in the project diary (how to communicate it with your supervisors?)
   regular contact with your supervisors
end
write up the report
prepare for oral presentation/opposition
presentation/opposition

If you can't follow this planning the student must get in contact with her/his supervisors to discuss and revice the planning.
